

Automated External Defibrillator (AED) Course

This course is designed to compliment the 3 Day First Aid at Work course and can be delivered in conjunction with oxygen administration. This gives the First Aider more versatility in the range of treatment available to him / her. The life saving statistics of the AED are well documented making deployment and knowledge of use invaluable.

Entry requirements

There are no academic requirements to join this course, however individuals should be of reasonable fitness and not afraid of the sight of blood.

Course structure

The course covers and expands on the following areas:

• Chain of survival • Cardio Pulmonary Resuscitation (CPR) • Heart Problems • Abnormal Heart Rhythms • Resuscitation with an AED (Automated External Defibrillator) • Unconscious patient • Post Traumatic Stress Disorder (PTSD) • Choking

Assessment method

The course is continually assessed over the day and there is a more formal question and answer session during the final practical assessment.

Pass marks

There are no set criteria however a pass / fail will be given by the tutor depending on how the candidate conducts him / herself during the day.

Course duration

1/2 Days (the qualification lasts for 1 Year)

How much does the course cost?
