

Edged Weapons Awareness

Knife crime is at levels never before seen. Statistics are available on the number of knife crimes, types of knife crime, weapons used etc. Statistics tell part of the story firstly statistics rely on crime being reported and secondly statistics can be manipulated to highlight or hide a certain area. The fact is very straightforward. Knives and Edged Weapons are available in abundance and this area of crime blights or has the potential to blight every City Town Village and Community in the UK. Having an understanding and awareness of what sort of weapons are on the street will better serve you in your personal safety. If you know what the threat is then you can better prepare for it and hopefully defeat it. Come on our training sessions
