

# **Oxygen Therapy Course**

This course is designed to compliment the 3 Day First Aid at Work course and give the First Aider more versatility in the range of treatment available to him / her. This course can be given in conjunction with the AED course. Being able to safely administer oxygen therapy adds an extra dimension to the First Aiders repertoire.

## **Entry requirements**

Candidates should hold an in date 3 day First Aid at Work qualification and should be of reasonable fitness and not afraid of the sight of blood.

## **Assessment method**

The course is continually assessed over the day and there is a more formal question and answer session during the final practical assessment.

## **Pass marks**

There are no set criteria however a pass / fail will be given by the tutor depending on how the candidate conducts him / herself during the day.

## **Course duration**

1/2 Days (the qualification lasts for 1 Year)

## **How much does the course cost?**
